SAADMS- Admission Application

This is the admission application page. This will allow you to see what the student’s admission status is and see if anything is missing.

On this page you can see when their entry term is, application date, admission type, student type, residency status, application status and field of intended study.

This checklist will be used to identify items that are missing that could be preventing full admission.

If there is a date in the “Received Date” column, we have received the item and it has been entered into the computer.
