   **Who?**

6. **Catalog Description:** ☐ Now in Print, or ☑ Proposed Below:

   The anatomical and physiological bases of sensation will be reviewed. Moreover, traditional and contemporary theories of perception will be critically considered. How we see, hear, feel pain and temperature, and in general receive information from the environment; how our perceptions are affected by expectancy, knowledge, and higher-level organizational factors. Students will be expected to master basic concepts of sensory and perceptual function. Prerequisite: PSY 3120. 3 lecture hours per week.

### Course Justification

- This is a common elective course in four-year psychology programs, and is in line with courses taught in other Utah universities.
